### Principles of Membership

The strategy to develop membership is based on the following key principles:

1. Membership growth is the result of retaining existing members and attracting new members.
2. Growth requires investment in strategies to develop new members and customers.
3. Tracking memberships - who stays, who joins, demographics of membership, patterns of growth, etc. - is essential to evaluating growth and the success of growth strategies.
4. Everyone - VC, Association Members and Local Affiliates - benefits from membership development and needs to collaborate on strategies for growth.
5. Members are fundamentally responsible for developing their sport. Fees are an important way of ensuring the organization's capacity to develop the sport.
